Questions & Answers

Question: 1

You have installed the Gadget server and are trying to register new gadgets for your site. When using the Admin UI, you do not see the asset type FW_CSGadget listed in the search list, although this asset type is correctly enabled for your site. You can see “Find CS-Based Gadget” in the Start Menu for this asset type and it has been assigned “Any Role.” Other asset types for the site can be searched but not FW_CSGadget.
What could be the reason?

A. By default, the Admin UI does not allow you to find non-structural assets.
B. The gadget has not been properly registered.
C. The default language of the gadget is mismatched.
D. When registering the gadget, Show Gadget was not selected.
E. The XML registration of the gadget is corrupted.

Answer: B

Question: 2

A customer has a requirement to contribute content to the management environment (Server M) and make this content available to the live environment (Server P). The customer has decided to use the publishing functionality to accomplish this requirement. Which statement best reflects the configuration that is required?

A. Create a publish destination with the RealTime delivery type, configure a batch user on Server M, and configure a RealTime user on the target Server P.
B. Create a delivery type of Dynamic Publish, assign this delivery type to a publish destination on Server M, and create a batch user for both Server M and Server P.
C. Create a publish destination with the RealTime delivery type, create a batch user on Server M, and enter the RealTime username and password in the publish destination entry form. The RealTime user must have appropriate privileges for both the source Server M and the target Server P.
D. Create a publish destination with the RealTime delivery type, create a batch user with appropriate privileges for Server M, and create a RealTime user with appropriate privileges for the target Server P.

Answer: C

Question: 3
