Questions & Answers

Version: 5.0

Question: 1

An administrator is configuring and managing multisite deployments.
Which Association Member Status is an invalid status?

A. Inactive
B. Asymmetric
C. Active
D. Unreachable

Answer: A

Explanation:
https://docs.vmware.com/en/VMware-Cloud-Director/10.0/com.vmware.vcloud.spportal.doc/GUID-6BF0EE6A-D5F0-4918-BD74-40892D2880B0.html
ACTIVE - The association has been established by both parties, and communication with remote party was successful.
ASYMMETRIC - The association has been established at the local site, but the remote site has not yet reciprocated. UNREACHABLE - An association has been created by both parties, but the remote site is not currently reachable on the network.

Question: 2

The VMware Cloud Director administrator wants to make sure that the system is able to collect log bundles from all cells at once.
How should the administrator accomplish this goal?

A. Install vRealize Log Insight agent on each cell to redirect logs to a centralized location.
B. Configure a syslog server on each of the cells, and request the logs from the syslog server.
C. Map the log location on the primary cell to a shared folder on each of the other cells in the server group, ensuring they all have read/write rights on the primary.
D. Make sure the NFS server allows read-write access to the shared location by the root system account on each cell.

Answer: D

Explanation:
For multiple cells and packages, use this command and syntax to collect all the log bundles. The command will place the bundle in the transfer directory and report the exact location: Running a Multi-Cell Log Collection will not collect the Java Thread Dump, if required, run a Single Log

Collection from the required Cells. /opt/vmware/vcloud-director/bin/vmware-vcd-support --all -m

Question: 3

Which three steps are required to enable east/west firewall in VMware Cloud Director Tenant Portal? (Choose three.)

A. Click on Data Center Group and create a new Data Center Group
B. Go to Edge Gateways and enable firewall on one of the Edge Gateways
C. Go to Networking and enable Distributed Firewall for one of the Network inside the Network section
D. Activate Distributed Firewall inside the Data Center Group
E. Login to Customer Organization and go to Networking Section of Tenant Portal
F. Enable the firewall in NSX-T

Answer: A, C, D

Explanation:

Question: 4

A system administrator creates a common catalog to be used by all customers. For availability purposes, the catalog will be consumed by a different VMware Cloud Director instance in a different country.
Which catalog setting enables the catalog to be shared across VMware Cloud Director instances?

A. Published catalog
B. Subscribed catalog
C. Content library catalog
D. Shared catalog

Answer: A

Explanation:
Allow users to publish catalogs to organizations OUTSIDE of this cloud.

Question: 5

Which NSX-T resource can be used to back a VMware Cloud Director External Network?

A. Edge Cluster
B. Network Segment
C. Tier-0 Logical Router
D. Tier-1 Logical Router

Answer: C

Explanation:
https://docs.vmware.com/en/VMware-Cloud-Director/10.0/com.vmware.vcloud.spportal.doc/GUID-B937681E-329C-42D4-99BD-FAFF2A0BDF4C.html
