Answer: B

Explanation:

Question: 4

An Adobe Commerce developer was asked to customize a JavaScript component which is written as a function.

How would the developer extend the native JavaScript function?

A.

```
define([
    'mage/utils/wrapper'
], function (wrapper) {
    'use strict';

    return function (yourCustomFunction) {
        return wrapper.map(yourCustomFunction, function (originalFunction, config, element) {
            originalFunction(config, element);

            // add extended functionality here
        });
    };
});
```

B.

```
define([
    'mage/utils/wrapper'
], function (wrapper) {
    'use strict';

    return function (yourCustomFunction) {
        return wrapper.wrap(yourCustomFunction, function (originalFunction, config, element) {
            originalFunction(config, element);

            // add extended functionality here
        });
    };
});
```

C.

```
define([
    'mage/utils/wrapper'
], function (wrapper) {
    'use strict';

    return function (yourCustomFunction) {
        return wrapper.wrap(yourCustomFunction, function (originalFunction) {
            originalFunction();

            // add extended functionality here
        });
    };
});
```

- A. Option A
- B. Option B
- C. Option C

Answer: C

Explanation:

Question: 5

An Adobe Commerce developer wants to use LESS variables to make the default color of the text links match the default color of the body text. While keeping upgradability in mind, how would the developer make this modification?

A.

Create a file in a custom theme

`app/design/frontend/custom/theme/web/css/source/_theme.less` and add
`a {color: @link__color;}`

B.

Create a file in a custom theme

`app/design/frontend/custom/theme/web/css/source/_extend.less` and add
`a {color: @primary__color;}`

C.

Create a file in a custom theme

`app/design/frontend/custom/theme/web/css/source/_theme.less` and add

`@link__color: @primary__color;`

- A. Option A
- B. Option B
- C. Option C

Answer: C
