Answer: A

Explanation:

Question: 4

DRAG DROP

What is the correct sequence of steps for the requirements-gathering phase?

Select all that apply.

Answer:

Question: 5

A custom discovery stitcher creates a temporary table or array called customData using the Record customData; statement. Since implementing the custom stitcher, the amount of available memory on the ITNM server decreases more than normal while discovery is running. What is a potential problem?

- A. The customData table was not truncated before running the new discovery
- B. The stitcher is missing the delete (customData); statement
- C. The stitcher is missing the empty (customData); statement
- D. The stitcher is missing the end statement on the last line of the stitcher so the stitcher never finishes

Answer: A

Explanation:
