---

**Answer: B**

---

---

**Question: 3**

---

3. The software quality is measured via both functional and non-functional aspects.

- A. True
- B. False

---

**Answer: A**

---

---

**Question: 4**

---

Which of the following test cases is ideally suited for robotic testing?

- A. Test cases that are considered urgent and must be executed immediately (i.e. a PI Bug).
- B. Test cases that haven't been analysed thoroughly and will run only one time.
- C. Test cases that are complex in nature and require to be tested repeatedly.
- D. Test cases that are built upon a single data set.

---

**Answer: C**

---

---

**Question: 5**

---

Help Charlie and James make a collaborative decision!

- A. Charlie should consider running test automation with the help of leading-edge tools so that they can expedite the software evaluation process. In that way, James can have a final product to assess the requirements and plan the strategy to market it
- B. Both the managers should put DevOps culture into practice and track the progress of the product so that they can be in sync in providing the business and customer with their needs.
- C. Charlie can hire a team of testers to conduct manual testing. Meanwhile, James should start pre-marketing the product to build anticipation among the customers.
- D. Charlie and James should pass over testing the product and release it as is so that it can be marketed as soon as possible and garner unparalleled results.

---

**Answer: B**

---
