Questions
& Answers

Version: 4.2

Question: 1

Refer to the exhibit.

The image shows a 'HA Configuration' window. It has a title bar with a minus, maximize, and close button. The window contains the following fields and options:

- Mode of operation: master (dropdown menu)
- On failure: switch off (dropdown menu)
- Shared password: change_me (text field)
- Advanced options (expanded section):
 - HA base port: 20000 (text field)
 - Heartbeat lost threshold: 30 (text field) seconds
 - Remote services as heartbeat: ☐
 - Call recording sync: ☒
- Buttons: Apply, Cancel

In the event of a failover, which statement about the configuration shown in the exhibit is true"

- A. Once the unit has recovered from failure the mode of operation changes to slave.
- B. Once the unit has recovered from failure it goes back to its programmed state of master
- C. Once the unit has recovered from failure it stays in idle state until it is manually configured as master or slave
- D. Once the unit has recovered from a failure it shuts down.

Answer: D
