& Answers

## Version: 10.0

---

### Question: 1

---

A company establishes a deadline to respond to customer inquiries. During the month of June, an increase in customer inquiries lengthens the average response time per inquiry beyond the established deadline. To address the issue, the company decides to lengthen the deadline until the end of August.

How do you satisfy this requirement?

- A. Circumstance the process using theProperty and Dateoption, and specify a start date and end date for the case creation date.
- B. Circumstance the service level using theTemplateoption, and create a circumstance definition with the start date and end datefor the extended deadline.
- C. Circumstance the property used to record the due date for addressing the inquiry, and specify a start date and end date for the extended deadline.
- D. Circumstance the service level using theProperty and Dateoption, and specify a start date and end date for the extended deadline.

---

**Answer: D**

---

---

### Question: 2

---

While preparing to release an application, you notice a guardrail violation on an activity you wrote. The activity copies the content of a previous customer order to the current order. How do you address the guardrail violation?

- A. Justify the warning, since an activity is required in this situation.
- B. Replace the activity with a data transform to copy the content of the previous order to the current order.
- C. Identify an API activity to use in place of the activity you wrote.
- D. Ignore the warning if the compliance score is 90 or greater, since the application is considered ready for release.

---

**Answer: B**

---

---

### Question: 3

---

DRAG DROP

Match each development task to the appropriate role.

**Development Task**

Direct the development of an auditing process for purchase requests.

Design the class hierarchy of an application to share assets between IT and Accounting applications.

Configure a form to display the current department budget when entering a purchase request.

**Role**

System Architect

Lead System Architect

Senior System Architect

---

**Answer:**

---

**Development Task**

Direct the development of an auditing process for purchase requests.

Design the class hierarchy of an application to share assets between IT and Accounting applications.

Configure a form to display the current department budget when entering a purchase request.

**Role**

System Architect

Lead System Architect

Senior System Architect

**Question: 4**

In which situation does a case type for software upgrade requests reuse a rule through pattern inheritance?

A. The case type uses the approval section provided by Pega 7.

- B. The case type uses an authorization process used throughout the organization.
- C. The case type uses the Data-Party-Operator class to describe a work party.
- D. The case type uses a data type to describe the requestor.

---

**Answer: B**

---

---

**Question: 5**

---
