Questions  
& Answers

---

**Question: 1**

---

What key benefits might stakeholders realize from an Agile approach?

- A. The ability to bypass the change-management process, inserting new requirements and changes directly into the team as they meet daily
- B. The early and continuous delivery of valuable software, providing increased visibility and the opportunity for more frequent adjustments
- C. Increased access to the project and less reliance on formal reports and status meetings to better understand the current work and the risks the team is accepting
- D. The team's flexibility to make changes mid-iteration as business needs or priorities change, increasing the ability of the team to meet project commitments

---

**Answer: B**

---

---

**Question: 2**

---

What is the first thing that a team should do to estimate user stories for a project?

- A. Sort the user stories according to priority.
- B. Schedule a team meeting to understand them.
- C. Define the story points measure.
- D. Estimate through function point analysis.

---

**Answer: C**

---

---

**Question: 3**

---

A story point is the:

- A. Relative measure of the size of a user story.
- B. Duration it takes to complete a user story.
- C. Priority of the user story in the backlog.
- D. Business value of the user story.

---

**Answer: A**

---

---

**Question: 4**

---

According to the Agile Manifesto, which of the following describes the more valued items?

- A. Customer collaboration, following a plan, working software, and individual interactions
- B. Working software, individual interactions, responding to change, and comprehensive documentation

- C. Individual interactions, working software, customer collaboration, and responding to change
- D. Responding to change, individual interactions, processes and tools, and customer collaboration

---

**Answer: C**

---

---

**Question: 5**

---

On a particular project, product quality is being measured at regular intervals and is consistently below the acceptable level. In a Lean environment, how should this problem be addressed?

- A. The team should implement more rigorous testing at the end of each development cycle.
- B. Management should direct the team on specific actions that they should take to improve quality.
- C. Management should guide the team as it seeks to improve itself and reduce errors in the system.
- D. The Project Champion should review the acceptable quality threshold to ensure that it is realistic.

---

**Answer: C**

---

---

**Question: 6**

---

In reference to Scrum, each sprint should produce:

- A. An increment of potentially shippable product functionality.
- B. A set of documented product requirements and specifications.
- C. A release with testable and measurable functionality.
- D. An increment of potentially testable product functionality.

---

**Answer: A**

---

---

**Question: 7**

---

The primary purpose of a Sprint Review is for the team to:

- A. Demonstrate what was accomplished during the sprint.
- B. Discuss what went well, what didn't, and ways to improve.
- C. Prioritize and estimate stories planned for the next sprint.
- D. Individually provide status updates on user stories in progress.

---

**Answer: A**

---

---

**Question: 8**

---

On what should Agile estimates be based?

- A. A Work Breakdown Structure (WBS) from each iteration aligned with the project management plan

- B. A disciplined iteration schedule, which improves predictability, combined with reaction to changes
- C. Ball park figures collected from past Agile projects with scopes similar to the current project
- D. Initial resource breakdown based on the available person days in the full project duration

---

**Answer: B**

---

---

**Question: 9**

---

A value stream map is a tool used to identify the:

- A. Waste across the entire process.
- B. Highest value product features.
- C. Most valuable team interactions.
- D. Most likely flow of project risks.

---

**Answer: A**

---

---

**Question: 10**

---

When estimating initial velocity, the team should most likely:

- A. Discuss among the team their expectations of how many story points they can address.
- B. Use a Kanban workflow to identify steps and calculate velocity.
- C. Use velocity of past iterations or make a calculated guess.
- D. Discuss with the customer their expectation for the velocity of producing the product.

---

**Answer: C**

---
