Questions  
& Answers

# Version: 15.0

---

**Question: 1**

---

Which of the following statements is true regarding the Veeam Backup & Replication integration with supported Storage Systems for VMware vSphere are true? (Choose three).

- A. On storage accesses through NFS, VMs with snapshots will be skipped from Backup from Storage Snapshots
- B. Veeam Backup & Replication can backup virtual machines from a supported secondary storage array
- C. On storage accessed through NFS, VMs with snapshots can be protected with Backup from Storage Snapshots
- D. When Backup from Storage Snapshots is performed, VMware snapshot is never utilized
- E. Enabling Backup from Storage Snapshots for all backup jobs are not recommended

---

**Answer: A,B,E**

---

---

**Question: 2**

---

Which of the following Veeam Backup & Replication jobs can use integration with secondary arrays as a data source?

- A. Backup
- B. VM copy
- C. Replication
- D. Tape backup

---

**Answer: A**

---

---

**Question: 3**

---

Which is a prerequisite in order for the CRC check to be executed during a SureBackup Job?

- A. One or more of the SureBackup recovery verification tests failed
- B. The Backup file integrity check option was enabled in the SureBackup job settings
- C. The repository where the backup is stored is a Shared Folder (CIFS/SMB)
- D. The .vbm file is corrupt

---

**Answer: B**

---

---

**Question: 4**

---

A scale-out backup repository is configured with data locality policy. How is an extent selected during an active full backup? (Choose two.)

- A. Always the same extent as the previous full backup
- B. An extent determined based on load control settings and free space
- C. A different extent from the previous chain to avoid single point of failure, if possible on free space
- D. It tries the same location as the previous full if using a deduplication appliance

---

**Answer: A,B**

---

---

**Question: 5**

---

Which of the following actions generated the data recommended when raising a technical support case regarding a failed Veeam Backup & Replication job?

- A. Export the license file from the configuration options in Enterprise Manager
- B. Generate a zip of log files using the Support Information function
- C. Take a Veeam Zip of the VMs involved in the failed job
- D. Manually run a Veeam configuration backup to generate a new .bco file

---

**Answer: B**

---

---

**Question: 6**

---

You want to deploy an On-Demand Sandbox. While creating the application group, which sources can be used to add virtual machines to the Application Group? (Choose three.)

- A. Backup Copy in Backup repository
- B. Replica on non-Cloud Connect VMware vSphere host
- C. Replica on Cloud Connect VMware vSphere host
- D. Backup in Cloud Repository
- E. Storage Snapshot
- F. Backup on Backup Repository

---

**Answer: B,D,E**

---

---

**Question: 7**

---

Which of the following statements regarding the Backup from Storage Snapshots feature when

backing up virtual machines from a VMware vSphere environment are true? (Choose two.)

- A. Lower impact on WAN link during off-site backups
- B. Higher transfer speed from production NFS datastores
- C. A virtual machine with one virtual drive on shared storage and another drive on local storage will be processes with Backup from Storage Snapshots transport mode
- D. A virtual machine with one virtual drive on shared storage and another drive on local storage will failover to a different transport mode
- E. Reduce the impact of consolidating VM snapshots

---

**Answer: B,E**

---

---

### Question: 8

---

If the compression level and deduplication settings are changed in an existing job, previously created backup files will:

- A. Be deleted after creating a new active full backup
- B. Change according to the new settings
- C. Decompress and compress again with the new compression level
- D. Remain the same

---

**Answer: D**

---

---

### Question: 9

---

Which file extension are associated with Veeam Backup & Replication?

- A. .vbo
- B. .bco
- C. .vhb
- D. .vbs
- E. .vlb
- F. .vrb

---

**Answer: B**

---

---

### Question: 10

---

What is the purpose of scheduling a virtual synthesized full backup for tape jobs? (Choose two.)

- A. To avoid copying a full VBK file to tape from the source Reverse Incremental Backup Job
- B. To be able to offload forever forward incremental backups to tape

- C. To be able to restore files and folders from tape
- D. To be able to create the synthetic full backup directly on tape

---

**Answer: BD**

---

---

**Question: 11**

---

What other recovery mechanism can be used to restore guest os files if the virtual machine guest os file system is not supported by Veeam Backup & Replication Windows Instant File Level Recovery or Multi-OS File Level Recovery?

- A. File level recovery would not be possible
- B. Request a hotfix from Veeam Support
- C. Leverage Instant VM Recovery
- D. Use Extract Utility

---

**Answer: D**

---

---

**Question: 12**

---

How are VMware replica restoring points stored at the target host?

- A. As virtual machine snapshot(s)
- B. As incremental .vib files
- C. As incremental .vrb files
- D. As full .vbk files

---

**Answer: A**

---

Explanation:

Reference:

<https://helpcenter.veeam.com/docs/backup/vHYPERLINK>

["https://helpcenter.veeam.com/docs/backup/vsphere/replica\\_settings\\_vm.html?ver=95"](https://helpcenter.veeam.com/docs/backup/vsphere/replica_settings_vm.html?ver=95) sphere/replica\_settings\_vm.html?ver=95

---

**Question: 13**

---

Which are valid types of Veeam backup repositories? (Choose four.)

- A. Deduplicating storage appliance
- B. ESXi host database
- C. Microsoft Windows server

- D. Linux server
- E. Tape library
- F. CIFS (SMB) share

---

**Answer: ACDF**

---

Explanation:

Reference:

[https://helpcenter.veeam.com/docs/backup/hyperv/repository\\_type.html?ver=95](https://helpcenter.veeam.com/docs/backup/hyperv/repository_type.html?ver=95)

---

**Question: 14**

---

Which of the following statements regarding encryption in Veeam Backup & Replication are true? (Choose three.)

- A. If data is encrypted at rest, it means a Backup to Tape job is storing encrypted backups on tape
- B. If data is encrypted at rest, it means a Backup Job targeting a Backup Repository has encryption enabled
- C. A Backup Job has encryption enabled and is used at the source for a Backup to tape Job. If the Tape Media Pool has encryption enabled, the data will be encrypted a second time
- D. A Backup Job has encryption enabled and is used at the source for a Backup to tape Job. If the Tape Media Pool has encryption enabled, the data will be not encrypted a second time
- E. To ensure backups stored on tape are encrypted, enable encryption in the Backup to Tape job
- F. To ensure backups stored on tape are encrypted, enable encryption in the Tape Media Pool

---

**Answer: ACF**

---

---

**Question: 15**

---

Which predefined test performed on the Application Group during verification differs between SureReplica and SureBackup jobs?

- A. The application test is different for SureBackup and SureReplica
- B. There is no heartbeat test for SureReplica
- C. There is no difference
- D. There is no ping test for SureReplica

---

**Answer: C**

---

---

**Question: 16**

---

Choose the correct statements about the Failover Plan functionality: (Choose two.)

- A. Undo failover can be performed for the entire Failover Plan group
- B. The whole Failover Plan group can be failed back using the Commit failback option
- C. Failover Plans must be created in advance of a disaster situation
- D. A Failover Plan is permanent recovery solution that doesn't need to be finalized

---

**Answer: AC**

---

Explanation:

<https://helpcenter.veeam.com/docs/backup/cloud/cloudHYPERLINK>

["https://helpcenter.veeam.com/docs/backup/cloud/cloud\\_failover\\_plan\\_overview.html?ver=95"](https://helpcenter.veeam.com/docs/backup/cloud/cloud_failover_plan_overview.html?ver=95) failover plan overview.html?ver=95

---

### Question: 17

---

Which backup mode uses the file extension .vib for incremental backup files?

- A. Veeam Backup & Replication does not create files with the .vib extension
- B. Veeam Backup & Replication always creates .vib files to store increments and rollbacks
- C. Forever forward incremental backup
- D. Reverse incremental backup

---

**Answer: C**

---

Explanation:

Reference:

<https://HYPERLINK>

["https://helpcenter.veeam.com/docs/backup/hyperv/forward\\_incremental\\_backup.html?ver=95"/](https://helpcenter.veeam.com/docs/backup/hyperv/forward_incremental_backup.html?ver=95)helpcenter.veeam.com/docs/backup/hyperv/forward\_incremental\_backup.html?ver=95

---

### Question: 18

---

Veeam Backup & Replication establishes the stabilization point during SureBackup verification according to which of the following algorithms? (Choose three.)

- A. Stabilization by heartbeat
- B. Stabilization by maximum allowed boot time
- C. Stabilization by resource allocation
- D. Stabilization by application group
- E. Stabilization by IP
- F. Stabilization by application test

---

**Answer: ABE**

---

Explanation:

Reference:

[https://helpcenter.veeam.com/docs/backup/hyperv/surebackup\\_job\\_processing.html?ver=95](https://helpcenter.veeam.com/docs/backup/hyperv/surebackup_job_processing.html?ver=95)

---

**Question: 19**

---

Which additional metadata is captured when backing up vCloud Director VMs?

- A. Replica metadata
- B. vApp metadata
- C. vDC metadata
- D. Backup metadata

---

**Answer: B**

---

Explanation:

Reference:

[https://helpcenter.veeam.com/docs/backup/vsphere/vcloud\\_director\\_backup.html?ver=95](https://helpcenter.veeam.com/docs/backup/vsphere/vcloud_director_backup.html?ver=95)

---

**Question: 20**

---

Which Veeam backup & Replication functionality allows a VM to be powered on directly from a backup file?

- A. Planned Failover
- B. Full VM Recovery
- C. Instant VM Recovery
- D. Item-Level Recovery using Veeam Explorers

---

**Answer: C**

---

Explanation:

Reference:

[https://helpcenter.veeam.com/docs/backup/vsphere/quick\\_migration.html?ver=95](https://helpcenter.veeam.com/docs/backup/vsphere/quick_migration.html?ver=95)
